

CURRENT POSITION

Status: Working Professional
Core Strengths: Project Management discipline + Clinical/Healthcare domain credibility — a rare, high-value combination for regulated healthcare AI initiatives.

Project Management

Clinical/Healthcare Background

TARGET GOAL

Objective: Transition into **Healthcare AI Project Management** — leading AI/ML product implementations (clinical decision support, diagnostic AI, EHR-integrated tools) within 12 months.

AI PM Role

Health-Tech Sector

📊 SKILL GAP ANALYSIS

Category	You Have	You Need
Core Domain	Clinical/Healthcare knowledge, PM methodology (Agile/Waterfall)	AI/ML fundamentals & product lifecycle literacy
Technical Fluency	Process & stakeholder coordination	Data literacy (SQL basics), ML workflow, cloud/API concepts
Regulatory	Healthcare compliance awareness	FDA SaMD, HIPAA-for-AI, clinical validation frameworks
Credentials	PM experience	AI Product/Program Management certification, PMP (if not held)

RECOMMENDED LEARNING PLAN

Phase 1 • Months 1-3 — AI Foundations
AI/ML fundamentals (Coursera/Google AI), SQL & data literacy, Healthcare AI regulatory landscape (FDA SaMD, HIPAA)

Phase 2 • Months 4-6 — Applied Healthcare AI
AI Product Management course, EHR/clinical workflow + AI integration, Agile for AI/ML teams

Phase 3 • Months 7-9 — Specialization
Healthcare AI use cases (imaging, diagnostics, CDS), compliance certification, cloud/API fluency (AWS/Azure Health)

Phase 4 • Months 10-12 — Positioning
Portfolio & case studies, AI-PM/PMP certification, targeted job search & interview prep

SUGGESTED PROJECTS

1 Design a full PM lifecycle plan for a mock AI-based patient triage tool

2 Write a case study analyzing an FDA-cleared AI medical device rollout

3 Build a healthcare AI vendor evaluation & risk framework

4 Volunteer to shadow or co-lead a digital health/AI pilot at your current org

5 Publish a portfolio site/LinkedIn series documenting your pivot journey

NETWORKING STRATEGY

Communities
